Revised February 4, 2012

The quarterly journal of the Essex Society of Genealogists publishes compiled genealogies, contemporary records, and other articles largely concerning Essex County, Massachusetts, families.

As this file was created for my own use a few words about the format of the entries are in order. The entries are listed by *TEG* volume. Each volume is preceded by the volume number and year in boldface. Articles that are carried across more than one volume have their parts listed under the applicable volumes. This entry, from Volume 2, will illustrate the format used:

**2 (1982):59-60**

How I Happened to Be the First Mayflower Descendant to Claim Descent from Richard More  
Lydia Finlay

The first line of an entry for an individual article or portion of a series shows the *TEG* pages for an article found in that volume. When a series spans more than one volume a note in parentheses indicates the volume and page from which or to which it is continued.

The second line shows the title of the article, and the third line lists the author.

I have listed only articles with genealogical, instructional or historical content of interest to the genealogical researcher. I have not included features and series such as "Society News," "Book News," and "Queries."

This file currently shows the contents of the first fifteen volumes of *TEG*. It will be revised as more volumes become available to me.
