Revised March 15, 2013

A few words about the format of this file are in order. The Connecticut Nutmegger began as a monthly newsletter, Bulletin of the Connecticut Society of Genealogists. After a year it was succeeded by a quarterly journal, The Nutmegger. After another year its title was changed to The Connecticut Nutmegger.

The entries are listed by volume. Each volume is preceded by the volume number and year in boldface. Articles that are carried across more than one volume have their parts listed under the applicable volumes. This entry, from Volume 35, will illustrate the format used:

Hartford District Probate Records from 1750
Volume 16 (1750-1753) - Messenger to Riley (2-20), Robbins to Warren (194-212), Warriner to Wright (362-370)
Volume 17 (1753-1757) - Abbe to Bigelow (362-380), Bigelow to Evans (598-615)
Lucius Barnes Barbour and Helen Schatvet Ullman

The first line of an entry for an individual article or portion of a series shows the pages for an article found in that volume. When a series spans more than one volume a note in parentheses indicates the volume and page from which or to which it is continued.

The second line shows the title of the article, and the third line lists the author. Some articles have no author listed. In some cases, such as this one, a line or lines under the title show the range of surnames contained within each installment.

I have listed only articles with genealogical or historical content of interest to the genealogical researcher. I have not included articles and series such as book reviews, ancestry service or queries.

This file is a work in progress, and as each completed volume is released to the NEHGS web site a revision will be posted. Please address any corrections to the compiler at the email address given above.
